

In-App Fraud Reporting

Mastercard Credit Cards | Canada

The Problem

Fraud reporting today = Call → Wait 24–48 hrs → 45-day process.

Result: High cost, slow money back, bad CX.

The Goal

Let users report fraud in-app and get provisional credit in **<10 minutes**.

My Solution: Smart Dispute Hub

5 screens that take a user from “suspicious txn” to “money back” — without calling support.

Key Flows in Wireframes

- | | |
|----------------------------|---|
| 1. Home Alert | Proactive alert: “Suspicious transaction. Was this you?” → Tap No to start dispute |
| 2. One-Tap Dispute | Select transaction → Answer 3 questions → Submit |
| 3. Instant Decision | Auto-triage: Low risk <\$1000 = Provisional credit issued in 10 mins |
| 4. Status Tracker | Live updates: Dispute submitted → Under review → Resolved |
| 5. Ops Dashboard | For Fraud team: Win rate by reason code + auto-generated dispute packets |

Impact Designed For

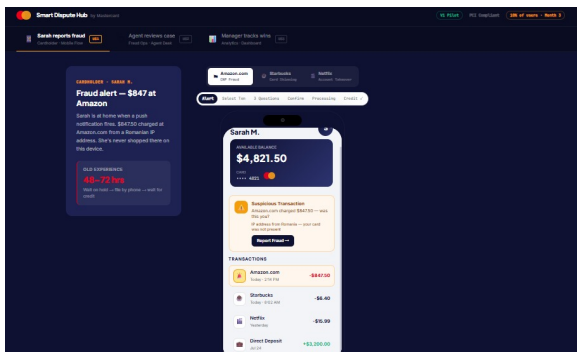

Speed	45 days to 15 days case time
Cost	35% fewer calls = \$2M saved/year
CX	Get money back in 10 mins vs 2 days
Win Rate	Better evidence = 55% → 70% chargeback wins
